DiamondDoge

The DiamondDoge Whitepaper aims to educate readers on our vision, strategy and roadmap. Below we illustrate in detail our unique redistribution mechanism. It's an engineering achievement unheard of until now in the BSC ecosystem. We are happy to be the pioneers and are excited to showcase the new use cases that this will enable. Safemoon was the one to bring awareness around RFI and HODL rewards. DiamondDoge will carry the innovation torch forward. We will share our vision with the world: the first auto-claim BUSD reward mechanism.

DiamondDoge in a nutshell

DiamondDoge is the next evolution of a yield-generating contract on the Binance Smart Chain (BSC): you get rewarded in BUSD instead of tokens. The tokenomics are superb! A combination of real-time buyback functionality to mitigate major dumps and redistribution in BUSD, together provide investors with tokenomics that reward holding to the max.

The token contract employs a static rewards system—12% of every transaction which is split into:

- 5% Buyback
- 3% Redistribution in BUSD
- 2% Marketing
- 2% Dev Wallet

And an additional 4% selling-only tax to liquidity Pool.

In order to fully understand the BUSD redistribution, we need to educate you on the reflection concept:

BUSD redistribution

Popularized by HODL and GhostFace, a transaction fee is applied to every single buy /sell order, tokens are then swapped in realtime for BUSD and added to a POOL (similar to how liquidity pools work). Holders can then go to a website and manually claim the BUSD earned at specific time (daily / weekly / etc..). The BUSD they can collect are based on their token holdings % and the current pool size.

TL;DR: You hold, then go to the website and request your BUSDs

DiamondDoge redistribution

Claiming manually is unintuitive for a couple of reasons:

- Need to connect your wallet manually to the website
- Time constraints as you need to return frequently to manually claim your BUSD
- Educating holders is complicated. It's difficult for them to understand the value until they go through the full claiming experience. More difficult to market.

We created a unique system that auto-claims for every single holder the amount due. We call it the DiamondDoge PROTOCOL.

The way it works for holders: You buy tokens and hold them, every 6 hours you'll automatically receive BUSD in your wallet. Not a single action is required. Your DiamondDoge tokens amount is persistent and won't change.

Behind the scenes:

- The contract keeps track in an array of all token holders
- The contract keeps an index into the array for processing
- Every transaction processes a certain number of users, depending on the transaction size (bigger token transfers can process more, since the gas will still be proportionally less than the value of the tokens)
- The token is based on a Dividend-Paying Token Standard, which means all BUSD the contract gains will be split equally proportionally to the token holders.
- When a user is processed, the contract checks how many withdrawable dividends they have, and if it is above the minimum threshold for auto-claims, will either automatically claim those dividends for BUSD, or automatically buy back tokens for them.

This system is fully automated and doesn't add minimal gas fees proportional to value transferred. The number of holders processed through each transaction is dynamic and based on transaction size. Holders will receive dividends from the queue based on their position in the array. It's a fair system, fully automated.

What if I don't want to wait?

We will set up a function on the contract for impatient holders so they can claim manually.

How much can I earn?

DiamondDoge Launch

The protocol will be launched in August of 2021, through one distinct presale.

PUBLIC PRESALE FOR EVERYONE

Presale will be launched on

The presale link will only be sent in the telegram group at the last minute, to ensure we prevent bots from joining in. We're also limiting the maximum contribution per person.

DEX PUBLIC LISTING

Following the presale, DiamondDoge tokens will become available for purchase on PancakeSwap Exchange. exact token distributions percentages will be announced soon.

Token Information

NETWORK

Binance Smart Chain (BEP-20)

NAME

DiamondDoge

TICKER

DIDO

CONTRACT ADDRESS

0xF88fc677283d568c7702af47D490Ce09AE86B464

DECIMALS

9

Diamondnomics

7% Marketing

7% Development

7% Lambo Fund

2% Team

EACH TRANSACTION IS TAXED 12% AS PER BELOW:

5% Buyback

3% Redistribution in BUSD

2% Marketing

2% Dev Wallet

And an additional 4% selling-only tax to liquidity Pool.

Security of DiamondDoge

Locked Liquidity Initial liquidity will be locked for a minimum of 6 months to provide holders with peace of mind that the token can always be exchanged. A trusted 3rd party, DXSALE, will operate as the middle man to ensure that all raised liquidity is locked in a secure locker for the full timeframe.

The token contract is verified and available for viewing on bscscan.
